USER CONFERENCE APR 29–MAY 1 | BOSTON, MA

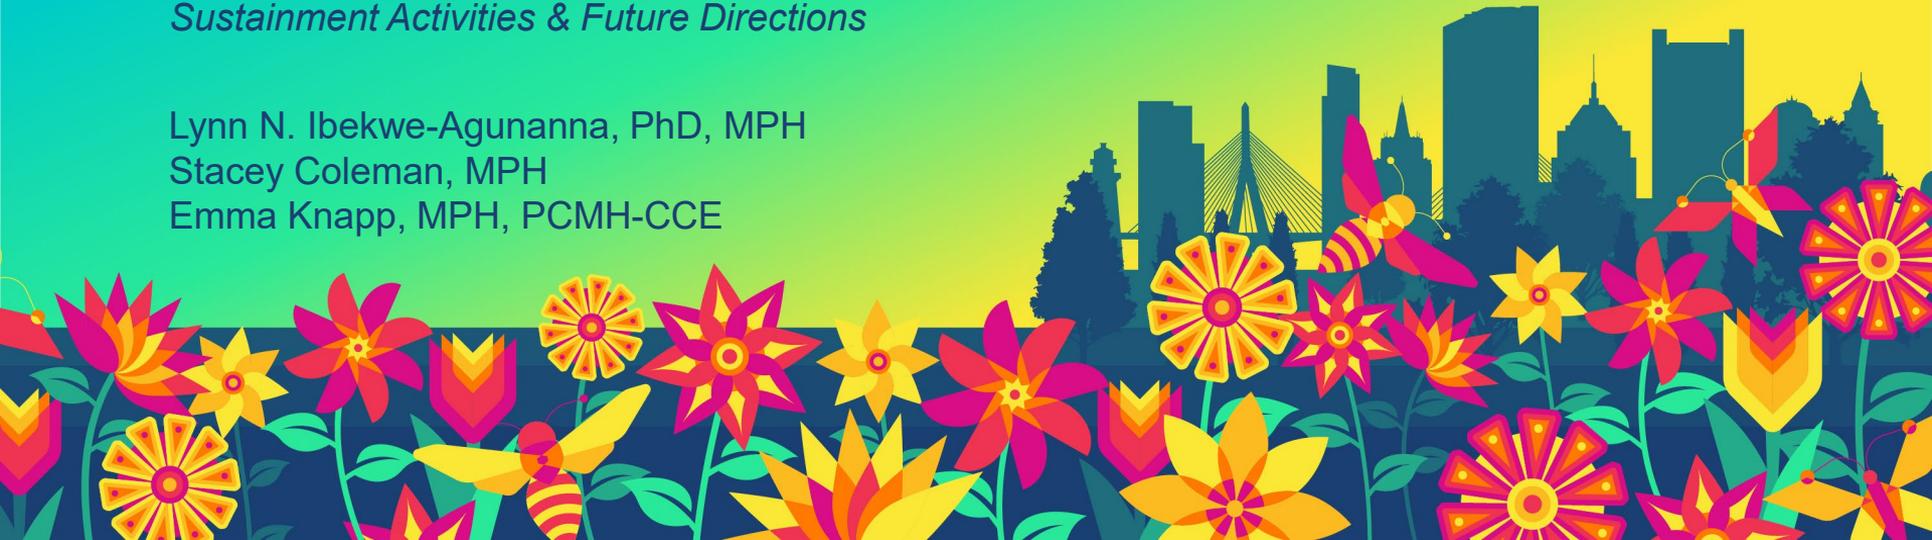

ISCCCE
IMPLEMENTATION SCIENCE CENTER
FOR CANCER CONTROL EQUITY

Screen, Track, Act | Optimizing Cancer Screening and Follow-Up Practices

*Findings from the “Tools to Close Cancer Screening Gaps Pilot,”
Sustainment Activities & Future Directions*

Lynn N. Ibekwe-Agunanna, PhD, MPH
Stacey Coleman, MPH
Emma Knapp, MPH, PCMH-CCE

Speakers

Lynn N. Ibekwe-Agunanna PhD, MPH
Assistant Professor,
UT Southwestern Medical Center

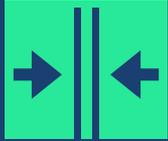

Stacey Coleman, MPH
Director of Quality Management,
Coastal Family Health Center

Today's Agenda

Project Background

Disparity Paradox

Tools To Close Screening Gaps Pilot

Overview & Findings

CHC Partner Perspective

Coastal Family Health Center

Next Steps

Looking Ahead & Future Planning

Project Background

Cancer screening **reduces** cancer morbidity and mortality.

*Yet, **disparities persist...***

The Disparity Paradox in Cancer Outcomes

*The more preventable and
treatable a cancer is...
the greater the disparities
become in survival.*

(Tehraniyar et al. 2009; 2016)

The Role of Implementation Science

*Closing the gap between **what we know works**—evidence-based interventions, practices, clinical guidelines—and **what is used in practice**.*

ISCCCE

New DRVS Tools

Abnormal follow-up measures

Abnormal follow-up point-of-care alerts

Open lab orders measure

Screening and abnormal follow-up gap closure dashboard

Abnormal Follow-Up Measures* & Open Lab Orders Measure

Abnormal FIT Follow-Up*

Patients aged 45-75 who have had a positive FIT/FOBT test in the last 12 months and have received Colonoscopy referral or completed Colonoscopy within 6 months of the test.

Cervical Cytology Abnormal Follow-Up*

Patients who have received cervical cancer screening where the result was interpreted and indicated possible malignancy who have received the appropriate follow-up according to the results.

Abnormal Breast Cancer Screening Follow-Up*

Female patients aged 40-75 who have had a breast cancer screening in the last 12 months with a result indicating possible malignancy and have received the appropriate follow-up according to the results.

Open Lab Orders (Completed Lab Volume)

Labs that were completed in the measurement period. Track completed labs by lab type. Used to monitor fluctuations in lab data coming into DRVS. *Includes FIT/FOBT, Pap, and HPV labs.*

*** Requires additional mapping**

The Implementation Journey

Findings | Clinical Outcomes

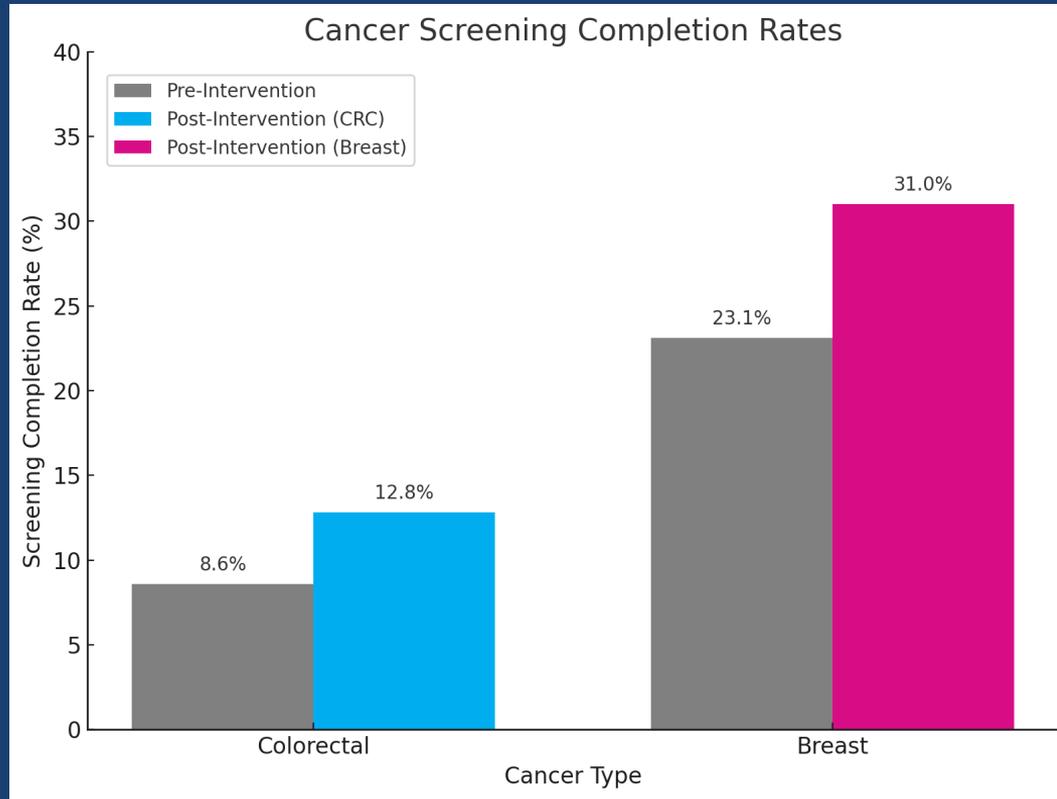

Diagnostic Follow-Up Completion by Screening Type and Timepoint

Diagnostic follow-up for both screening types **improved significantly** at all three timepoints.

Findings | Clinical Outcomes

Screening completion for both cancer sites **improved significantly.**

Findings | Implementation Outcomes

Online Survey

Tools and facilitation: Highly acceptable, appropriate, and feasible.

Qualitative Interviews

- **Tools:** Well-designed, easy to use, and an advantage over existing tools/previous practices.
 - *Gap closure dashboard highlighted as an important value-add*
- **Facilitation:** Well-thought-out, structured, and designed; not complicated; and supported tool integration.

CHC Partnership

CHC Partner Perspective

Experiences

Sustainment

Next Steps

Coastal Family Health Center (CFHC)

FQHC in South Mississippi

- **13 stand-alone clinics**, 1 mobile unit, 5 pharmacies, & 23 schools
- **36,000+ patients** served annually; over **110,000 visits**

Size

Family and internal medicine, pediatrics, psychiatry/behavioral health, lab, radiology (including 3D mammography), & social services

Specialties

Ryan White and Healthcare for the Homeless Programs

Special Populations

Patient-Centered Medical Home & Joint Commission Accredited for Ambulatory & Behavioral Health

CFHC | Overcoming Challenges in Cancer Screening & Follow-Up

CFHC & Clinical Quality Measure

- Responsible for breast, colorectal and cervical cancer screening.

Challenges in Cancer Screening & Follow-Up

- Struggled to improve cancer screening and abnormal follow-up rates.

DRVS Implementation (2019)

- Initial improvement in screening rates, but still not maximized for significant outcomes.

Measure	Goal	2020 Outcome
Colorectal Cancer Screening	30%	21.31%
Breast Cancer Screening	50%	26.57%

Partnership with ISCCCE & Azara

Tools to Close Screening Gaps Pilot

- Collaboration with ISCCCE & Azara provided knowledge & resources.
- Helped optimize Azara for colorectal & breast cancer screening and follow-up.

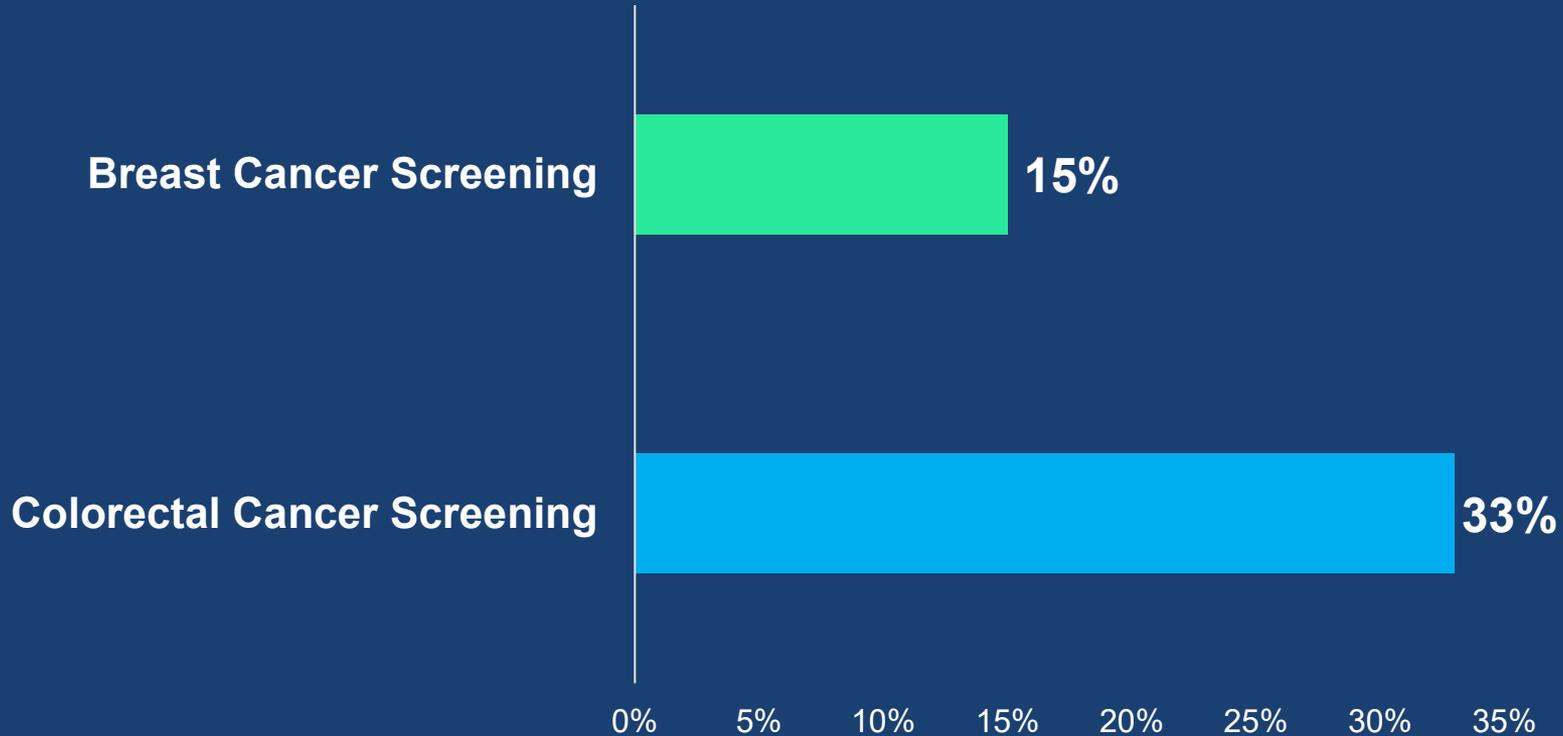

Key Project Support

- Developed dashboards, scorecards & alerts for tracking.
- Mapped workflows for real-world clinical integration.
- Engaged provider/nurse teams to enhance patient care.
- Leveraged APO for outreach & FIT FOBT follow-ups.
- Designed PDSA for FIT FOBT mail-back process with CHWs.

CFHC | Project Successes

Percentage Increase

Next Steps

Next Steps for CFHC

Enhancing Colorectal Cancer Screening

- Integrated Cologuard into NextGen for improved screening rates.

Strengthening Data Accuracy

- Implemented ongoing data hygiene program.
- Leveraging Azara's data validation tools with HCCN/PCA support.

Measure	Goal	2020 Outcome	2024 Outcome
Colorectal Cancer Screening	30%	21.31%	27.1%
Breast Cancer Screening	50%	26.57%	47.7%

Help us continue to improve

Achieve, Celebrate, Engage!

ACE'd it? Share your DRVS success story and become an Azara ACE!

Show your organization has used DRVS to **A**chieve measurable results, **C**elebrate improvement in patient health outcomes, and effectively **E**ngage care teams and/or patients. Stories should showcase how DRVS helped your organization overcome a challenge, the tools and solutions used to drive improvement and details of the successes that resulted from your initiatives. ACEs should be able to provide examples that quantify quality improvement, cost savings, operational efficiency or patient health improvement.

Benefits:

- Azara will help tell your story and provide a client-branded version for your use
- Potential to create a 2-4 minute video or hour-long Azara-hosted webinar
- Potential to be featured at next year's Azara User Conference
- Win Azara swag!

Submit your success story by completing the form [at this link](#).
