

Synthesize integrated data to deliver value-based insights

Azara provides health plans a scalable proven technology with timely, actionable clinical insights to easily partner with provider organizations on clinical quality, risk and performance improvement initiatives.

Azara's population health solutions enable successful data integration essential for clinical quality, health equity, risk stratification, cost and utilization, care management and coordination.

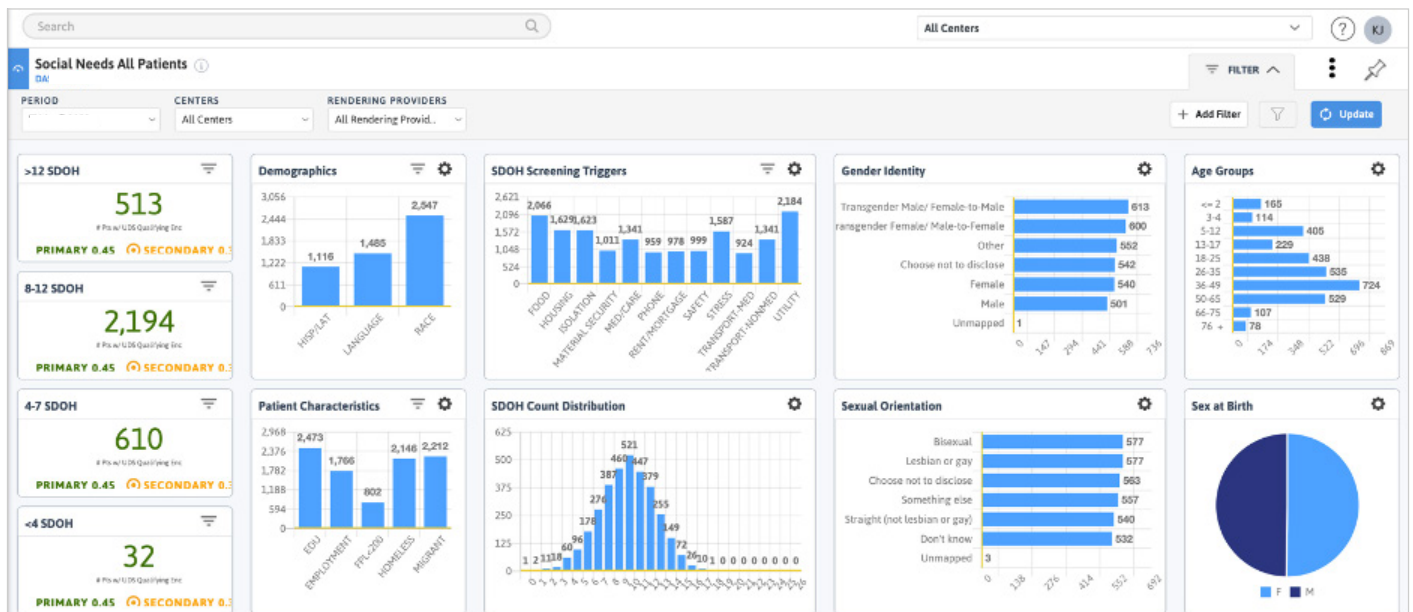

Health Plans use Azara solutions to **engage with providers and members**—improving care by enabling plans to:

- Utilize **validated supplemental data from providers** to gain more complete and timely insights to members' conditions and risk
- Drive action and resolution through **quality and risk alerts integrated in the EHR** and patient summary
- Deliver **comprehensive care gap information at the point of care**, at-scale across an entire network
- Use **expanded clinical insights**, including SDOH and demographics, to improve HEDIS measures and ensure consideration of the whole patient including SNS-E assessments

Customized for your needs

- Actionable insights through **longitudinal views**
- **360° views** of member/patient/episode-level data
- **Smart member engagement** for member/patient outreach
- Maximize **care coordination efficiency** with cohorts
- **Track trends** through administrative dashboards
- **Performance tracking** through provider scorecards and targets
